

Hexagon Louver

Thickness: 1/8" (3mm)
Maximum Size: 12" x 12"

Hexagon Louvers are commonly used in conjunction with our standard diffusion, colored and dichroic products to reduce glass and brightness from a variety of light sources. We keep an extensive inventory of MR11 1.370" diameters and MR16 1.965" diameters while custom sizes and framed louvers are made to order.

Features

- Made from low density high strength material originally used for structural use in the aircraft industry
- Can be fabricated to any shape or size
- Our standard MR11 and MR16 louvers provide 45 degree cutoff. Special cut-off requirements are available.
- Available in aluminum color or black
- Can withstand temperatures of up to 350F
- Readily available of the shelf in MR11 1.370" diameter and MR16 1.965" diameter sizes
